

IPS FWP

DESCRIPTION:

The FWP wall panel employs a flat appearance providing a monolithic look that is great for high-profile architectural applications. The interior skin has a Mesa profile.

FEATURES:

- The FWP Panel utilizes concealed clips and eliminates thermal short circuits.
- The standard exterior surface is 22-ga. Galvalume® coated steel with silicone polyester or Kynar 500/Hylar 5000 coatings.
- IMPs allow for fast assembly times and easy installation, resulting in reduced construction labor costs and earlier business starts.
